

Lamin-Art®'s unique selection of wood prints features rare and exotic species, as well as dramatic renderings of native woods. We utilize a 3 to 4 stage printing process for our wood reproductions adding clarity, depth and complexity to the print for a more realistic and natural look than standard wood print laminates. In addition, Lamin-Art wood prints feature large repeats and a diverse selection of matching patterns making them ideally suited for a broad range of design applications, including column wraps, bar faces, reception areas and all types of furniture. Lamin-Art offers this guide to help you achieve maximum design potential when specifying any of our wood reproductions. To view full sheet images of any of our Premium Wood Prints, please refer to our Wood Prints Portfolio brochure or browse our product catalog online at [www.laminart.com](http://www.laminart.com).
