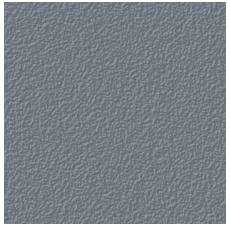
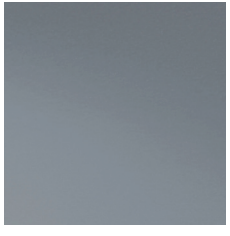
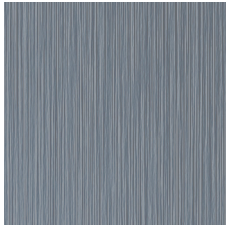
FINISHES



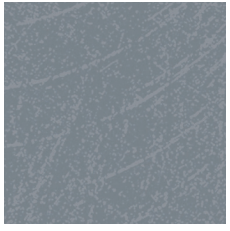
Textured (T)
A non-directional matte finish with moderate reflective qualities. (LRV 10.0).



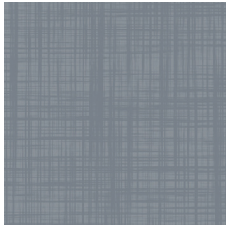
Gloss (G)
A smooth, mirror-like finish suitable for applications where high reflectivity is desired (LRV100.0). Recommended for vertical / low wear applications.



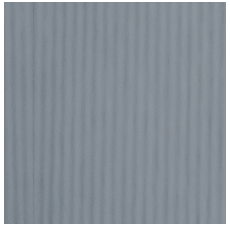
Chrysalis® (A)
A gently-etched pattern which creates a brilliance and texture similar to that of brushed metal (LRV 10.0). Recommended for vertical / low wear applications.



Catalyst® (B)
A spiral-etched pattern which creates a brilliance and texture similar to that of brushed metal. (LRV 18.0).



Crisscross (L)
A subtle tactile grid of fine intersecting lines running lengthwise and widthwise along the sheet (LRV 15.0). Recommended for vertical / low wear applications.



Corrugated (C)
A dimensional surface of alternating furrows and ridges running lengthwise along the sheet, featuring a soft finish with low reflective properties. (LRV3.0) Recommended for vertical / low wear applications.

TECHNICAL INFORMATION

Grade: GP48 Standard Grade – Sheet Thickness: .048" (1.2mm)

Grade: GP28 Vertical Grade – Sheet Thickness: .028" (0.7mm)
*Pearlescence is not offered in Post-Forming Grade.

Sheet Sizes: 4' x 8' (1270mm x 2438mm) and 4' x 10' (1270mm x 3050mm)
*Corrugated finish is available in 4' x 10' sheet sizes only.

Maintenance: Lamin-Art® general purpose high-pressure decorative laminate may be cleaned with a damp cloth, warm water, and a mild soap or household cleaning products. Cleansers that contain abrasives, acids, or alkalis may damage the decorative surface, and are not recommended. Stubborn stains may require the use of hypochlorite bleach followed by a clean water rinse.

Oyster Shield High-Wear Protection: Using an exclusive manufacturing process, our Oyster Shield High-Wear Protection™ increases the surface abrasion resistance without sacrificing their beauty. It's available on select Pearlescence® laminates. The result: Pearlescence® laminates with Oyster Shield High-Wear Protection™ are suitable for both horizontal and vertical surfaces. Please note that, according to the NEMA manual: "The scratch resistance of HPDL is influenced by lightness and gloss. Lighter colors and textured surfaces have better scratch resistance than darker, smoother colors. Therefore, the choice of color and finish should be made to suit the particular application for which it is intended."

Design Tips: For installations with both vertical and horizontal surfaces, we recommend specifying our regular Pearlescence® product for the vertical surface and a matching or corresponding pattern with Oyster Shield High-Wear Protection for the horizontal surface. This allows you to maximize the visual impact of your design while providing the durability you need. Another option to consider is specifying our Chrysalis® line, which features the look and feel of brushed metal, for the vertical surfaces.

Fire Rating: Fire Rated HPL Class II.
